

Spike Stent Productions

discography Alex Dromgoole (Lexxx)

Lexxx started his career as an assistant engineer, spending four years learning the art of mixing and production alongside the Grammy award winning producer/mixer Mark 'Spike' Stent. Here he worked with artists such as Bjork, Madonna, Gwen Stefani, Goldfrapp and Linkin Park amongst others.

In November 2007 Lexxx decided to set out on his own combining both his amazing technical skills with his own musical talents (he is a classical guitarist).

He has already mixed the Black Kids album 'Partie Traumatic' and has just put the finishing touches to his production of the Esser album, setting him on the path to becoming one of the UK's most exciting producer/mixers.
